**MemCons, Your Partner for Sustainable Future**

(MemCons) provides world class Consulting and Training services in Best Maintenance and Reliability Practices as well as Energy Management Systems for various industries. Our engagements involves

- On-site training and consulting services
- On-site implementation support
- Public training
- Facility Maintenance Management
- Energy Audit and efficiency measures
- Supply of Industrial control systems, accessories and Instrumentations

We help Create, Develop and Build **SKILLS** for higher **PRODUCTIVITY** and **PROFITABILITY**

## HOW DOES MEMCONS GUARANTEE POSITIVE RESULTS

Our trainings are characterized by real life experiences and hands-on activities to help your staff improve and adapt to the current best practices most suitable for your plant. Our sessions use practical situations,

techniques, guidelines and applications to enable the participants develop consistent, useful and relevant measures of performance in maintenance and energy management. To be able to accomplish this, we:

- Seek to understand the background of our client to meet your training need
- Continuously Research and develop our training courses
- Work with trainers and consultants of real-time industrial experiences.
- Offer reasonable rates.
- Offer post-training support with Implementation Journal

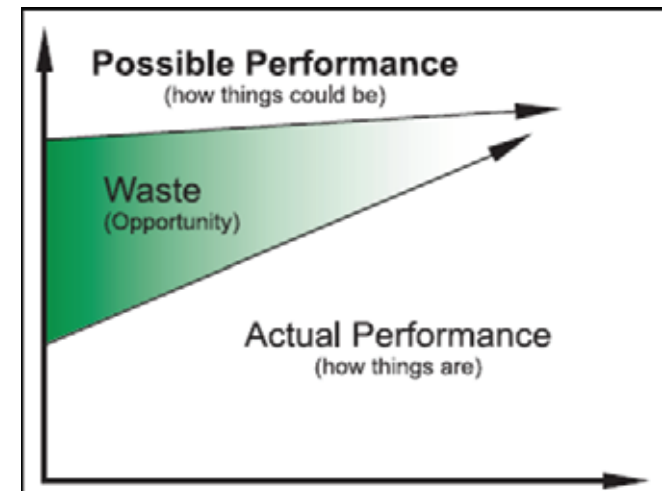

**MEMCONS** partner or collaborate with clients to develop 'tailor made' training programs (On-Site Training) or in-house trainings as well as organizing public training and conferences.

### We Consult and Train in;

- Plant Maintenance Management
- Hydraulics, Pneumatics and PLC's
- Facility Maintenance Management
- Production/Operations Management
- Change Management
- Energy Audit and efficiency measures

***MemCons, Your Partner for Sustainable Future***

What improvement could your outfit achieve? Do you have a plan to close the gap between how good you are and how good you could become?

If you take action to implement **MEMCONS CBP**, (Current Best practices) the waste trends will continuously decrease
